WILL NOT RAISE WATER RATES

CHISE ALREADY GRANTED- ing claim ordinance was passed: COMMITTEE REPORT IS CON-CURRED IN.

MEETING HELD LAST NIGHT

The city council will not grant the request of the Greencastie Water Works Co., that the water rates in Greencastle be raised, A few weeks ago, the Water Works Co., in a lengthy petition submitted to the council alleged that the company as operated under the present franchise was loosing money and asked that the council agree upon a raise in rates.

The council met with the secretary and general manager of the company Mr McCullum and dismissed the question with him. The matter was then referred to the council as a committee on the whole. Tuesday night the report of the committee was submitted to the council in regular meeting.

The report the committee recommended that the council not grant the request of the Water Works The committee in its report stated that it believed that the city of Friday evening. council has no legal right to grant the request; the rates having previously been fixed and the franchise accepted by the Water Works Co. SQUARE CONTRACT

AT LEAST SEVEN FIRMS WILL TRY AND GET THE PROPOSED IMPROVEMENT OF SQUARE WORK.

MAY USE A STEAM SHOVEL

That there will be more bidders for the proposed imrovement of the square than bid on the work before. is the opinion of City Engineer Lane. There were five contracting firms bid on the work when first advertised, but all were rejected. The bids were rejected as none were as low as the cost of the work, as estimated by Mr. Lane.

It is believed that each of the five firms, which first bid on the work, will make a second bid for it. Besides these five bids, several others are expected to bid for the contract. Two Terre Haute men were here Tuesday and stated that they would bid for the work. These men stated that if they got the contract, a steam shovel would be used to take up the old surface of the streets. Friday night was set for the hearing of bids.

RUSHING WORK ON

LARGE FORCE OF MEN BUSY TEARING UP OLD SIDEWALKS 3 AND MAKING CUTS AND FILLS -CONCRETE WORK TO START SOON.

TO USE A STEAM MIXER

The work of improving east Washington street is being pushed by Contractor Bergen, On account of the bad weather last week and the week before, the work was hindered. However, the fair weather of the past week has enabled Mr. Bergen to make up some of the lost time. A large force of men are busy taking up the old sidewalks, curbing, making the excavations and hauling the dirt to places where it is necessary to make higher. The work will be ready for the starting of the sidewalks in a few weeks. The old walks have been taken up on both sides of the street from the east end of the street, west to Bloomington street. Contractor Bergen stated Wednesday that a steam concrete mixer would be used so as to complete the work as soon as possible.

DePauw's first annual music festival opened Tuesday afternoon with a concert given by students of the DePauw Music School, Selections were rendered with a beauty and power that was a distinct compliment to the high standard of the music school.

The firs, number-"The Song of the Rhinedaughters," by seven pupils of Miss Oldfield was one of the most finished numbers on the program and showed accuracy in technique. A feature was a string quartet by Matthews, Pelham, Mann and Clark.

Misses Julia Day, of last year's graduation class, Leola Trueblood, Laura Towne, Imogene Mc-Lean, Alice Trout, and Mr. Sherley Rhea of this year's graduation class showed themselves to be capable representatives of the school in piano work while the vocal solos rendered by Miss Lois Illiff and Miss Iva Smith more than supplemented those of Mrs. McKerman, whose work exhibited remarkable breadth and poise.

HIS NATURAL INFERENCE.

First Experience at Entertaining

Nobility. An English lord was traveling through this country with a small party of friends. At a farm house the owner invited the party to supper. The good housewife, while preparing the table, discovered that she was entertaining nobility, was overcome with surprise and elation. All seated at the table, scarcely a moment's peace did she grant her distinguished guest in her endeavor to serve and please him. It was "My lord, will you have some of this?' and "My lord, do try that." "Take a piece of this, my lord," until the meal was nearly finished.

The little four year old son of the family, heretofore unnoticed, during a moment of supreme quiet saw his lordship trying to reach the pickle dish, which was just out of his reach, and turning to his mother, sald: "Say, ma, God wants a pickle. -Argonaut.

He Didn't Mind. A certain railway in Michigan has a station entitled Sawyer's Mills, but

usually called, for short, Sawyer's. A rural couple on one of the trains attracted much attention by their evident fondness for each other, until the brakeman thrust his head in the doorway of the car and called out "Sawyer! Sawyer!"

"Reuben" suddenly assumed the perpendicular and indignantly exclaimed. " Well, I don't care if you did; we've been engaged three weeks."

Same Old Story.

The tram was crowded. Nevertheless, a very large foreigner and his wife pushed their way in. A young gentleman-a relic of a fast disappearing civilization-rose to give the lady his seat. An English barrister, arguing before the criminal court, says Answers, remarked with much solemnity to the presiding justice:

about his shoulders. The Wolf

An unshaven face appeared at the hedge opening. The eyes were small and shifty, the hair short and coarse. The owner of the face was lying on the grass in the shadows. He had been asleep and an unusual sound awakened him.

He was ragged and coarse and unkempt. His face was pale-save where the stubby beard covered itand its palor seemed unwholesome.

He was just out of prison. He had been there nearly five years, and his crime was burglary. They had given him a little money when he left the prison, but that was soon gone. It was the drink that took most of it. Now he was a vagabond, a tramp and he would soon drift back into crime. There seemed to be nothing else left for him. Garbed as he was, the prison seal upon him, he had no right to expect decent employment.

He had been out of prison two weeks and in that time had made no effort to secure work. He loitered along the highway, getting food where he could and sleeping 'neath the sky.

It was the laughter of a child that awakened him. At first, being confused with sleep, he didn't know what it was. Then he heard it again and crept to the hedge opening and peered through. He saw a beautifully kept lawn with thick hedges bordering it, and at one side a summer home with a wide porch. There were vines and roses about the porch and the place had an air of wealth and refinement.

Close to the hedge, some twenty feet away from the opening, a boy was playing. He was a handsome little fellow of barely five years, prettily dressed and with an intelligent

The skulker in the hedge watched him with lowering look. The child represented the class with which he was at war. The laws were made by this prattler's father and his kind too oppress unfortunates. If he, the vagabond, had a child, would be be like this petter youngster?

The man made a queer noise in his throat. It was meant for a laugh. He hadn't laughed in so long a time that the effort almost hurt him. His child would be in rags, his playground an alley where he would pick up his first lessons in the school of crime. Why should this be so? It was unjust. Why should half the world toil and suffer that the other half might live in ease and comfort?

The boy had a wooden Noah's ark on wheels and he was martialing the animals on the sod before him. It was their unsteadiness on the insecure footing that made him laugh. With much care he arranged them in line, but the unwieldy elephant toppled over and dragged the others with him. And the boy laughed again.

A sudden desire for companionship seized the man-even the companionship of a child. He crawled through the opening and seated himself on the grass.

"Hello, son," he said. The boy looked up.

"Hello," he answered. The child showed no surprise and no dread. The big brown eyes regarded him for an instant and then turned back to the eargo of the ark.

The man was pleased at this. Shabby and uncouth as he was he had not alarmed the child.

"Big family you got there, son" he "Very naughty family," the boy re-

He laughed as he held up the striped block and the man laughed,

The boy began to reload the boat. "Poor Cap'n Noah, he's gone," he said in a pathetic tone, "an' Shem is gone, and somebody has bwoke off de wabbit's ears, an' I tant find de tam mel no more. Pittey bad, ain't it?"

Much to his surprise the man found himself doing what he was told to For five years he had been do ing what he was told to do, but al ways unwillingly. This was different He caught up the tongue of the wagon and started toward the house, the boy dancing about behind him with many "whoas" and "dit-aps." Leap ing and prancing-to the intense de light of the driver-the vagabond had almost reached the porch, when a tall man suddenly appeared on the upper step.

The vagabond stopped and stared The man was looking down at him and his gray eyes seemed very keer and bright.

The vagabond knew him-did he know the vagabond? They had held the same relative positions beforethe gray eyed man and the unhappy criminal. Then the gray eyes had searched his face as they were search ing it now. For this was the judge and this the burglar.

The vagabond drew a quick breath He was growing restive under that keen gaze.

"There, Davie," said the gray eyed man, "take your playthings into the house. Mamma wants you.'

The boy came close to the vagabond as he drew away the cord. He pat ted him lightly on the arm. "He ain't really a horse, daddy,

said the child. "He's a wolf." The vagabond, still held by that earnest gaze, slowly nodded, as if to confirm the child's words.

"Run in, laddie," said the tall man. and the child, with the ark in his arms, laughingly obeyed. "Sit here Rodney."

The vagabond stared at the tall man. How he had hated him! How he had longed to throttle him when he pronounced that five-year sentence! And this judge, with his smooth cheeks and his fine airs, was another representative of the class with which he, the vagabond, had been eternally at odds. He hesitated, then took the proffered chair.

"You know me, then?" he muttered. "Yes, Rodney, I remember some faces. What are you doing?"

"Guess you can tell by lookin' at me," retorted the vagabond. His tone was harsh, his manner sullen. 'I'm what the boy called me-a wolf. I prowl along the roadway, an' I eat the bones that are thrown to me. The tall man shook his head.

"Is that the best you can do, Rod-

"It's the best I can do until I get back to the old life. That'll be pretty soon now."

Again the tall man shook his head. "I heard good reports from you," he "They told me you could be trusted.

The sullen eyes were raised. "Who takes any interest in a wolf

like me?" "More people than you imagine, no doubt. One of them was a good woman who saw you and talked with you in prison. She left a little money with me to give to you. She told me to say that she hoped it would help to start you on the right path-on the right path, Rodney."

"Few paths are open to me," growled the vagebond.

But he was affected for all his assumed hardness.

"I meant to send this money to you in time, Rodney, but they let you out sooner than I expected. I will find the good woman's letter presently. It is fortunate that your steps were turned this way.

His words were kind, his voice gen-

The vagabond looked up. His mouth twitched, his gaze drooped. These were the first kind words he had heard since he passed through the prison gates. And they came from the man who had burned him with

that five-year sentence. "If you'll let me have what you say is intended for me, I'll go," he hoarse-

"Do you mean it?" he hoarsely de manded. "Yes.'

"But you know me?" "Yes. "You know my record?"

"Then how-how can you trust

The judge slowly smiled.

"I knew there is something good in you," he slowly said. "There's something good in the worst of men. But the good in you is nearer the surface. A better judge than I am found it out. I mean the child." He paused and smiled. "When I saw you romping with Davie I realized that here was a man who was worth whatever help I could give him. When I saw that the boy had no fear of you, that he liked

you and treated you as a companion, I felt that I could trust you-trust you and help you."

The vagabond sat and twirled his battered hat. His eyes were hidden. It was some little time before he looked up. The judge was standing with his hand outstretched.

The vagabond hesitated. He looked about him as if he thought of running away. Then he took a step forward and clasped his grimy hand about the firm white one.

"God bless you!" he murmured. A childish laugh rang out from the hallway. "Here I am, Mister Wolf," cried the

"Judge," he said, "look me in the eyes an' say 'Rodney, I trust you.'" The judge did not smile and the look from his gray eyes was steady. "Rodney," he said, "I trust you."

Church Built from One Tree. A congregation at Santa Rosa, Cal., rejoices in the fact that it worships in a church which has been built from a single redwood tree. The main building of the church is eighty feet long by forty feet wide, and, in addition, there are an audience room large enough to seat four hundred persons, another room seating ninety, a pastor's study, and the usual outoffices. Every bit of the church, even to the shingles on the roof, was made from the wood of a single tree, and yet when the edifice was completed, there was an abundant store of timber left over. The German military authorities are experimenting with the application of wireless telegraphy to balloons carrying self-registering aparatus. One object is to make the balloons descend at any desired moment. This is effected by placing in the balloon a receiver of electric waves connected with mechanism controlling a valve. When a wireless message is received the valve opens, and the balloon de-

ENEATH the hands of the sculptor the marble grows to living shapes that hold the world in thrall, and so beneath the passing years is the marble of our childish lives hewn into the deeds of manhood, but it is the mother hand that molds the clay from which unfinished idea the final figure is made.

If the clay represents an imperfect ideal, if it lacks the spur and the soul of greatness, all the glimmering white of the marble will not make up for the loss, and that is why the fleeting impressions made upon the flexible clay are so important to a sculptor, and why a mother's hand should be very wise and careful in molding the character of her boy or girl.

A few days ago a prominent man made the assertion that the woman who let her children coax her into giving way to them was preparing them for a future of bribery and corruption.

It is not a pleasant thought, is it? Yet to a great extent it is true, for only the recognition of authority and the law can make the men and women of tomorrow good citizens. And, after all, you know, while they may be our children first they are citizens of the state second, and upon them depends the standing of the nation in the coming years.

Of course it is hard to see the shadows of disappointment fall over their baby faces, hard to see their sweet lips quiver and the big eyes fill with tears. And it is, on the other hand, so delightfully easy to take back the "no" and substitute "yes," and see the joy flash into their faces, but after a few times of this the parental "no" makes no impression upon the boy or girl.

They begin to realize that mother's word is not absolute and final. They protest, and coax and cry, and the lines of their lives are distorted, and even the great sculpture of life cannot remold them into fine men and women.

Few laws and simple laws should govern childish lives, but they should be as immutable as those of the Medes and Persians.

Don't make hasty decisions about things. But when once you have told your youngsters what is to be done or left undone do not change it.

Honesty, fairness and obedience are the three great things in life which make fine men and women, and those of you whose arms are about the wee throbbing bodies of your little children must set those three things higher than your love, if, when the passing years bring new thoughts and new ideals and new sorrows, you would have our boys and girls ready to face every situation fairly and se-

FRENCH CARPET DESIGNS

Among the new carpets of the year there are some which might have come down to us from the period of Louis XIV, so dainty are the designs

All the patterns are small, as may be expected of these French carpets. and the borders which have been as wide as five-eighths of a yard, are

now 12 inches. An especially pretty effect is gained in the two-toned carpets in gray, lavender, pink, etc. The delicate French gray, with a geometrical design in the light tone, is delightful. while the gray ground with a delicate lavender flower at intervals is

almost too pretty for use. Most of the French carpet comes in body brussels, and while it is lovely in the dainty bedroom or boudoir, it may be used in almost any other

room in the house. The housekeeper who does not use matting in summer will hail these "Thank you, judge. That's the light carpets with delight as her warm weather floor covering.

The two-toned effects are steadily gaining in popularity, which their beauty and novelty certainly merit. there is one thing you mustn't fail to In two shades of brown they are especially pretty, while for the colonial bedroom the carpet in two shades of blue is especially appropriate.

But no matter what colors are used in these French carpets, no glaring effects are shown, everything being subdued and soft.

Javelle Water Easily Made By Housewife

No housewife should be without her javelle water with which to remove obstinate ink or ink stains, This is made from one pound of sal soda, one-fourth pound of chloride of lime and two quarts of cold water.

These should be thoroughly mixed. let stand for several hours, drained, and the clear liquid bottled and kept in a cool place. The stain should first be wet with the javelle water and then rinsed well with cold water. Repeat, if necessary, and wash at last in ammonia and water.

Tailored Waists

The specialty shops are again showing plain tailored waists in fine French lawns, batistes and linens, and in combinations of white and

Perfectly plain, except for a frill down the front and a few tucks across the front, these will appeal to the woman who must needs do her own ironing, but who yet can afford and who likes the daintily made waists.

COULD STAND ANOTHER. Your Children? They Were Not the Kind the Lady Had Referred To.

A commercial traveler tells the following of a little social gathering in eastern Ontario: "Dinner was a little late. A guest asked the hostess to play something. Seating herself at the piano, the good woman executed a Chopin nocturne with precision. She finished, and there was still an interval of waiting to be bridged In grim silence she turned to an old gentleman on her right and said: Would you like a sonata before dinner?" He gave a start of surprise and pleasure. "Why, yes thanks!" he said. "I had a couple on my way here, but I think I could stand another.'

SICLIANS AND CALABRIANS.

"Sicily," according to a writer in the Pittsburg Gazette, "has always heen a great and glorious country, and a great factor in the welfare of Italy," and then, for the purpose, no doubt, of bringing to a close the current controversy over the relative merits of the different brands of Italians, he added, "All those qualities attributed to Sicilians must instead he attributed (and so are in Italy and out of Italy) to that disgrace of Italy, the Calabrian Provinces, whose history has nothing to compare with the glorious past and present of

Nevertheless, neither the island nor the islanders, as a whole, have the best of reputations, in or out of Italy It and they have not a little history but we do not recall any of it, even in the early Greek days, that was particularly "glorious." As for the Calabrian Provinces, they are not close to Sicily or inhabited by much the same sort of people for nothing. In the one as in the other, there is a dreadful deal of surviving mediaevalism, and the passions turn easily and promptly to homicide.

FATHER ANGELO ON COURTSHIP.

Not to hold hands; no saunterings in shady paths; no buggy rides; no close companionship on the sofa; no saying good night again, soft and low, at the garden gate; the presence of parents in the parlor and the enforced departure of the young man at 10:30 sharp - alas for memories of Lover's Lane, St. Joe, and that universal holding of hands which is a very good sign in the summer time.

Is strict propriety to divest courtship of all its delights? Even in Puritan days John Alden was not so proper when he spoke for himself. To the Young Person who regulates the conduct of herself and her eld-Father Angelo's rules of court

ship will seem unduly rigorous. Yet they form an excellent code where chaperonage is too generally resent ed and dispensed with as it is with

The minimum age limit for marriage fixed by the priest will seem arbitrary. A man is better married than single long before he is thirty, and to regard women under twentyfour as too immature for the responsibilities of domestic life is not to know the American girl.

THE FEEL OF RICHES.

Mr Carnegie, the most sensitive soul in the world to the tragedy of wealth has further taken the universe into his confidence as to how it feels to be rich.

"I have been in a dream in Pittsburg," said Mr. Carnegie, as he looked at the \$23,000,000 institute bearing his name, "and I am still in a dream." Aladdin had at least been compelled to rub a lamp, while what he had raised has come without effect and sacrifice. "So far as I know," the dreamer continued, "there are as many bonds in the safe deposit vault as there were before."

Only the most cynical can refrain from the tear sympathetic. Conce the inner woe of this rich man unable either to realize that he owns anvthing or that he has parted with anything. "It is impossible to make one self understand," said Mr. Carnegie in his musing way, "that he owns a great fortune." One can fancy a hard-headed Scotch relative saying: "Andy, Andy, pinch yersel'!-New York

A NEW PERIL FOR POETS.

From Rome comes the extraordinary account of a spiritualistic seance which an ordinary table, not content with the usual knocking produced by disembodied spirits hurled itself at the poet Gabriele d'Annunzio and pursued him around the room. Prof. Hysop and Mr. Funk have not yet voiced their opinions of this remarkable phenomenon, but no doubt the Society for Psychical Research will take it up presently and we shall have it all duly authenticated and explained. Meanwhile authors all over he world, and furniture menufacturrs also are in a state of percurbation, because of this latest development in transcendental physics. It opens up an appalling prospect if, as the reports clearly indicate this table was imbued with some violent dislike of the poet.

BOGUS BARONETS.

Ambitious young women on this side of the world will nave anxious interest in the disclosure made by a special committee of the British Parliament investigating the matter, that Burke's Peerage is untrustworthy. Of the 1061 baronets set down in that directory, 60 are condemned as interlopers; they have no right to the title. The parliamentary committee recommends revision and expurgation. With 1000 real baronets left, there are perhaps enough o go around; but the possibility of taking one of the bogus 60 for the genuine will give our Newport aristocracy cold shivers.

With one down in the first. Shook hit to center and scored a minute later when Wileth slammed one through Patterson into right garden, Bickner flew out, Kelley walked. Beyers hit to right scoring two more. Barrett hit to center, but Neff ended the merry-go-round by fanning.

In the fourth Neff called for double to center; Lammers was safe on Crouch's error. Lawker was out via Johnson route. Neff scored on Martin's wild throw to first; Lammers advanced to second, stole third and scored on Crouch's error. Wileth and Buckner were easy outs.

In the eighth Poly waited until two men were down before starting things. Lammers arrived at first by fielders choice, stole second and took third on Schlademan's error. Lawker hit, scoring Lammers, stole second and scored when Shook bounced one past Patterson. Wileth fanned.

DePauw had the bases full in the first, but Neff pitched himself out of the hole by fanning two. In the sixth she got started again, but a double play Lawker to Snook to Barrett made possible by the ume's mistaken decision

DEBATERS GO TO CAPITAL

IN SEARCH OF MATERIAL

Professor Gough, with Hunt and Bolman, both members of the negative team to represent DePauw in the triangular debating league, composed of Indiana, Wabash and DePauw, were in Indianapolis on Monday afternoon, gathering material from the State Library.

A debate between the negative and affirmative teams was held this morning. While the two groups are practically through with their speeches there is yet much work to be put in in preparing for the rebuttal. Almost every day this week the teams will meet for practice, and a trial debate will be held between the two sides every Monday. Professor Meade is coaching the affirmative team, while the negative is in charge of Professor Gough and Dr. North.

The dope from Wabash and Indiana as to the final outcome of the debates is as yet uncertain. The negative and affirmative teams to represent the Scarlet have already met in a trial debate, and the negative was declared the winner.

After having been out only 15 minutes the jury in the case of the Central Trust Co., against Brown & Mathews of Bainbridge Tuesday returned a verdict in favor of Brown & Mathews. The Trust Co., as executors of the estate of Nathan Ader, deceased, was suing to determine whether Brown & Mathews had rented two business rooms in Bainbridge for a period of one year or three years. The jury found that Mr. Ader, before his death, had greed to rent the rooms to the firm for a period of three years at a rental of \$15 a month.

The partial eclipse of the sun which is scheduled for April 28, will be visible in Greencastle and central Indiana about sunset, on that day, according to the information given out by Professor Coggshall, of Indiana university. If the weather is clear, the moon will be seen cutting across the southern edge of the sun and will darken a small portion of the disc for about thirty minutes. Scientists are looking forward to the eclipse of next October, when the moon will pass between the earth and the sun.

An exceptionally sad death was that of Mrs. Albert Coleman, of game this afternoon. Coach Tapp near Portland Mills, who died on accepted and the two teams were Thursday afternoon, after suffering excrusciating pain for several hours from serious burns. Tuesday of last week, Mrs. Coleman purchased some stove polish of a traveling salesman, and the following Thursday morning used some of it to brighten the heating stove, Mrs. Coleman then started to polish the kitchen range, when she accrdentally spilled some of it on the stove. The polish evidently contained an explosive, and in a flash the fire from the combustion enveloped Mrs. Coleman, burning her clothing so dreadfully that the rubber combs in it were melted. Three fingers on her right hand were burned off and her body was frightfully mutilated. Dr. R. C. Peare, of Bellmore, was summoned, but there was then no hope of her recovery. Mrs. Coleman died at 3 o'clock in the afternoon. Brief funeral services were held Friday and the body taken to Iowa for burial. She is survived by her husband and two sons .- Rockville

Postmaster Lockridge has receive ed no answer from the three petitions recently sent to the postal headquarters, at Washington, asking that the night clerk at the local postoffice, not be taken off. It is believed that the postal authorities will let the matter drop and that Greencastle will continue to have a night clerk. Should the night clerk be dispensed with, it would cause much delay in the mails received here during the night. There are twelve pouches of mail from as many different trains received here each night. Should the night clerk be done away this mail would lay in the postoffice all night and would not be distributed until late in the morning. Instead of being in the lock boxes, early in the morning, it would be between 10 and 11 o'clock before it was all sorted and Sunday. each parcel put in its right place. Besides this the retarding of the sorting of the mail, would necessitate that the carriers start on their morning delieveries almost two hours later than they do under the the bowels without griping. Ask near 9:15 o'clock and noticed a present arrangement.

The Pension Board met Wednesday in the office of Dr. W. M. Mc-Gaughey.

The county council met today . to consider the matter of appropriating money to build a new bridge across White river at Waverly to take the place of the old covered bridge recently destroyed by fire. County Surveyor Blunk had prepared plans and specifications for a new bridge and they were discussed by the council men and county commissioners who met with them. Martinsville Reporter.

TIME TO SPRAY APPLE TREES.

But Don't Spray at All Unless You Do is Thoroughly as Careless Work is a Loss.

Thad MacCulloch, the apple tree expert of Wabash College, whose articles recently attracted much favorable comment, says that this is the proper time to spray your apple trees. An application should be made at this time, when the leaves are coming out and before the fruit buds open, in order to prevent the attack of the scab fungus, the curculio, and the apple leaf mites. For this application use commercial lime-sulphur to forty parts of water To this should be added arsenate of lead at the rate of three pounds to fifty gallons of the lime-sulphur solution. This mixture is a combined fungicide and insecticide, consequently it will prevent the attack of the above if it is applied proper-

"Remember," says Mr. McCulloch, "that thoroughness means success in orchard work. If you do not spray thoroughly it is a loss of time and money to spray at all. Always spray each limb until it drips. I would be very glad to advice anyone about different spray mixtures and spray outfits, or I will gladly examine your orchard for you and advise you as to what is most needed in it.

could not state positively that the handkerchief belonged to her husband, she stated that he had many handkerchiefs of that pattern and that she believed that the one found belonged to Casey.

Yesterday afternoon Mrs. Sims estified that Casey was not home on the night of the murder. Myrcle Randel, a sister of Mrs. Sims vis the next witness and she and testined that she had been at the Sims nome on the night of the murder and that Casey was not home at 10 o'clock, when she left.

She further testified that she had accompanied Mrs. Sims to the shop where Casey worked at the time of the Grand Jury investigation, Casey, she said, had sent for Mrs. Sims. He asked her if she nag been summoned to appear before the Grand Jury and she told that she had not. 'Well, they have mixed me up in that murder case," he said, "but I have friends and money, and can get witnesses to swear just what I want them to." He then asked his on sale Tuesday, April 18, at Langwife what she would testify to if don's at 1:30 p. m. Season tickets she was summoned and she told only will be reserved. him she would tell the truth. "If you swear to what I want you to, I'll pay your fare to Greencastle.' Casey is alleged to have said "But if yon won't, you'll have to look out for yourself.

Mrs. Jennie Freeman, mother of Mrs. Sims testified that she did most of the washing for Mr. and Mrs. Sims, and that the handkerchief with the several small holes burned in it found at the feet of Hendren, was like the ones she washed for Casey.

John Petit was the next and last witness introduced by the prosecution. Petit was in court under guard of a Terre Haute officer, he being under arrest there for larceny. Petit, who is an electrician. formerly lived just north of Greencastle. He testified that he was in the Perry saloon on the night of the murder and that Sims, came in the saloon and told the bartender that the traction agent had beat him out of \$4. Sims, he said, was intoxicated, and seemed excited.

With this testimony the state closed its case and Judge McGregor. attorney for the state, turned over to Judge Rawley the handkerchief and bullet. As the bullet was handed to the Judge, Mrs. Hendren, who was seated near the Judge, broke down and her sobbing could be heard over the entire court room,

The evidence introduced by the state has been most damaging and Brazil people who have followed that trial are greatly surprised at the strong case the state has made against Sims.

The defense opened its case with the evidence of O. T. Spear, an insurance agent, formerly of Greencastle, but now living in Terre Haute. He stated that he had been at the interurban station on the night of the murder and had collected some insurance from Hen-

sizing up the station. The man was tall. Spear stated that the man's actions caused both himself and Mr. Hendren to become suspicious. The man, Spears said, was not Sims.

Len VonCannon, an electrician from Terre Haute, testified that he came from Greencastle to Brazil on the afternoon of the murder on the 5:35 car and that Casey went to Bazil from Greencastle on that same car. Fred Grothe, a barber, testified that Casey was in his shop in Brazil between 6 and 7 o'clock on the evening of the murder.
